STATISTICS BRANCH

NOTICE TO USERS

MEXICO

The 1991 export statistics for Mexico in this publication are subject to revision. Available information, from a number of sources, indicates that considerable numbers of live cattle were shipped from Alberta to Mexico but were not reported by Statistics Canada. Appropriate caution is, therefore, advised in using the data herein.

EASTERN EUROPE

For the purposes of this publication, the country content of this region has not been changed. All former Soviet states/republics are still described together as the Union of Soviet Socialist Republics (U.S.S.R.). As well, exports to the component states of the former Yugoslavia have not been separately listed.

Modifications to the classification of countries will be adopted from Statistics Canada when the geo-political climate in Eastern Europe stabilizes.

APPENDIX

1990 Production Estimates	124
1991 Production Estimates	125
International Trade Classification of Countries	126
Commodity Index	129
Destination Index	131

INTRODUCTION

This report presents domestic export statistics for agricultural and food products during calendar year 1991. It provides estimates of out-of-province exports and out-of-country exports. The latter, reported on a customs basis, are presented in two sections, the first detailing exports by commodity and the second detailing exports by country of destination.

Out-of-country, or international, export statistics are compiled by Statistics Canada according to the "General" system of trade defined by the Statistical Office of the United Nations. Under this system, domestic exports encompass all goods grown, extracted or manufactured in Canada, including goods of foreign origin which have been materially transformed in Canada.

Exports are, in principle, valued or recorded at the values declared on export documents which usually reflect the transaction value or the actual selling price. Canadian exports to overseas countries are valued at "Free on Board" port of exit basis, including freight charges to that point but net of discounts and allowances. **Prior to 1990, Canadian exports to the U.S. were valued at F.O.B. point of lading basis, net of freight charges, discounts and allowances.**

SOURCES AND METHODS

The out-of-province export estimates in this report represent shipments to other Canadian provinces as well as out-of-country exports. They were generally derived from provincial production data through a supply and disposition process. The methodology involved the use of data from a variety of sources, ranging from government publications to private industry contacts.

International export statistics were obtained from the International Trade Division of Statistics Canada. In a number of cases adjustments and revisions to Statistics Canada's export data were required to overcome inaccuracies resulting from the attribution of exports on a province of lading basis rather than by province of origin.

OUT-OF-PROVINCE SHIPMENTS

The estimated value of out-of-province shipments decreased in 1991 by 3.4 per cent to $3,859.5 million, from $3,994.9 million in 1990. The decrease was due mainly to declines of $85.4 million and $36.6 million in animal products and crop shipments.

Grains and oilseeds accounted for 43.8 per cent of the total estimated value of shipments in 1991, relatively unchanged from 43.2 per cent in 1990. Meat and animal products accounted for 31.0 per cent of shipments, with live animals representing a further 12.8 per cent. Forage seeds and other crops and crop products accounted for another 8.6 per cent. Peat moss and beverages constituted the remaining 3.8 per cent of shipments.

INTERNATIONAL EXPORT OVERVIEW

The value of Alberta's out-of-country exports of primary and processed agricultural products in 1991 was estimated at $2,518.1 million. This represented about 65.2 per cent of out-of-province shipments. In 1990, out-of-country exports totalled $2,692.2 million and represented 67.4 per cent of the out-of-province shipments for that year. Although moderate gains were achieved for some commodities, in general exports tended to be lower than year earlier levels.

For the second successive year, Alberta's exports of live cattle and calves increased significantly, both in quantity and value. The 1991 export volume was 300,097 head, up 24,511 head from 1990. Combined with an overall higher average price during the year, this increase resulted in a 12.9 per

cent rise in export value, to $286.6 million. Sustained demand for feeder and slaughter cattle in the United States was the main reason for the increase. Live hog export sales, on the other hand, decreased by 19.3 per cent and 10.8 per cent, respectively, from a year earlier to $28.4 million and 224,839 head.

Beef exports rose in value by 4.4 per cent over 1990 levels to $96.3 million while quantity was up 3.1 per cent to 39 231 tonnes. Pork exports rose 7.1 per cent to 34 627 tonnes but due to reduced prices the export value was down 3.5 per cent to $82.0 million.

Wheat export, at a total value of $1,013.2 million, was down 2.4 per cent from a year earlier but remained by far Alberta's most important agricultural export commodity, accounting for over two-fifths of total export revenue. Export quantity was up 12.9 per cent to a record 6.2 million tonnes.

Oat exports tumbled 49.6 per cent and 53.3 per cent from 1990 levels to 216 325 tonnes and $24.4 million, respectively. Barley exports dropped to 1.98 million tonnes ($221.2 million) from 2.28 million tonnes ($306.9 million) while canola/ rapeseed shipments declined from 734 385 tonnes ($229.7 million) to 707 072 tonnes ($201.7 million).

TRADING PARTNER REVIEW

In 1991, Alberta's most important agricultural export markets included the United States, Japan, The People's Republic of China, and the U.S.S.R. These four countries accounted for $1,882.8 million worth of shipments, fully three-quarters of the total value of the province's international agricultural exports during the year.

United States of America

The U.S. was Alberta's biggest customer in 1991, purchasing $804.4 million worth of agricultural commodities. This represented an increase of 6.3 per cent over the 1990 level of $756.7 million. Increased live cattle shipments constituted a major portion of this rise, reaching $286.6 million, up from $251.0 million in 1990.

Beef exports rose by $4.9 million to $82.9 million as a result of a modest increase in sales volume. However, despite a rise in the quantity of pork exported, a decline in value was recorded for the year due to sharply lower prices from 1990 levels.

For the second year in a row, oat sales declined markedly, with value dropping from $47.6 million in 1990 to $20.8 million and quantity dropping from 398 320 tonnes to 187 105 tonnes. Noteworthy increases occurred in canola oil and peat moss shipments to the U.S. but, mostly, commodity export levels were below corresponding year earlier levels.

Japan

Japanese imports of agricultural commodities from Alberta in 1991 were estimated at about $469.2 million, compared with $577.5 million and $528.6 million in 1990 and 1989, respectively. Canola seed, at $200.1 million, was the single most important export commodity, even though down markedly from the 1990 level of $221.7 million.

Barley, the second most important commodity exported to Japan, decreased to 444 856 tonnes ($55.6 million), from 530 103 tonnes ($71.4 million) in 1990.

Although exports of most commodities were down

from 1990 levels, beef shipments rose from 2 223 tonnes to 2 905 tonnes and the export value reached $11.7 million, up $1.7 million a year earlier.

People's Republic of China

Alberta's exports of agricultural commodities to the People's Republic of China in 1991 totalled $257.3 million, down from a record $284.8 million in 1990. Wheat and barley, at $241.5 million and $15.6 million, respectively, constituted over 99.9 per cent of the total export revenue.

Other Asia

Other Asian markets of significance to Alberta in 1991 included South Korea, Taiwan, Bangladesh, Indonesia, Hong Kong and Malaysia. Exports to these countries were worth $171.9 million, up from $152.2 million in 1990. The major commodities exported to the region included wheat and raw hides and skins.

U.S.S.R.

Exports of agricultural commdities from Alberta to the U.S.S.R in 1991 amounted to $351.9 million, up from $323.4 million in 1990 and $126.9 million in 1989. The main reason for the rise was a 619 914 tonne (50.5 per cent) increase in wheat shipments from 1990.

Western Europe

Exports to Western Europe in 1991 totalled $95.4 million, down from a 1990 total of $130.8 million. Belgium/Luxembourg, the United Kingdom, Italy, the Netherlands, and France with $20.0 million, $19.1 million, $16.0 million, $13.9 million, and $9.6 million worth of purchases, respectively, were the major markets. Wheat was by far the most important commodity, making up 37 per cent of the total value of exports to this region. Horsemeat was also important, totalling some $16.3 million in shipments.

Middle East

Shipments from Alberta to the Middle East decreased to a value of $116.1 million from a 1990 level of $224.2 million, mainly because of the unsettling effects of the 1990/91 Persian Gulf crisis. Since the war, there have been no shipments to Iraq and, as well, the value of exports to Saudi Arabia has dropped, from $115.0 million in 1989 to $95.1 million in 1990 and then to $40.1 million in 1991. Notable among the commodities shipped to the Middle East were wheat, barley, wheat flour, and peas.

Africa

Alberta's agricultural exports to this region in 1991 amounted to $57.4 million, down from $70.7 million a year earlier. The major reason for the drop was a $12.3 million decrease in shipments to South Africa. On a positive note, however, exports to Algeria, the most significant African market in recent years, rose 30.8 per cent to $31.5 million.

South and Central America

Agricultural exports to South and Central America from Alberta in 1991 were worth $92.7 million and $39.4 million, respectively. The combined total of $132.1 million was 10.5 per cent higher than the correponding total for 1990. Brazil ($40.9 million), Venezuela ($25.2 million), Cuba ($16.0 million), and Colombia ($13.3 million) were the most important markets in the region.
